

Pick YOUR Family With

PICK 5

The Lottery welcomes Pick 5
to its family of daily numbers games joining Pick 3 and Pick 4.

Six NEW Play Types!

Ways to Play

Like Pick 3 and Pick 4, Pick 5 can be played **Straight** (all digits must match in exact order to win), **Box** (all digits must match in any order to win) or **Straight/Box** (combines a 50-cent straight play and a 50-cent box play). The Combo option currently available on Pick 3 and Pick 4 will NOT be an option for Pick 5.

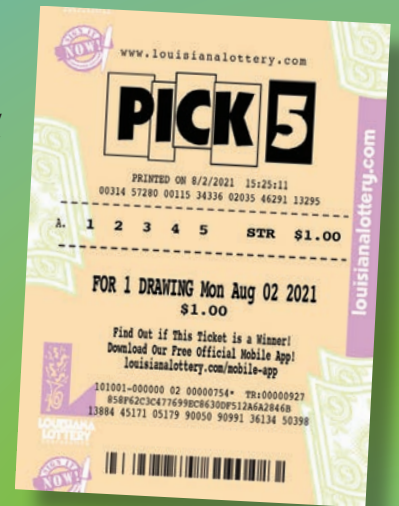

Six New Play Types

In addition to these tried-and-true, player-favorite play types, the Lottery will introduce six new ways to play and win with Pick 5. Players will be able to match just the first or last two, three or four digits in the 5-digit winning sequence to win. These new play types are called **Front Pair, Back Pair, Front Three, Back Three, Front Four and Back Four**.

For these play types, the players' numbers must match the designated numbers drawn in exact order. For each play type, only the number of digits needed for the play will print on the ticket. Placeholder asterisks will display for the digits not necessary for the play. For example, on a Back Pair play, only two digits will print on the ticket, preceded by three asterisks.

As with Pick 3 and Pick 4, Pick 5 players can either select their own digits to play or allow the terminal to select them (called a quick-pick).

How to Win

As the name suggests, a 5-digit number is drawn for Pick 5. Players must match at least two numbers in exact or all five in any order to win a prize depending upon the play type selected and the amount of the wager. Players will be able to place a 50-cent or a \$1 wager on Pick 5. The higher the wager and the odds, the higher the potential prize. *See the prize chart on back.*

Multidraw & Advance Play

Also like Pick 3 and Pick 4, Pick 5 will offer the chance to play selected digits for 2, 3, 4, 5, 6, 7 or 14 consecutive drawings. In addition, players can choose to start their play on any future drawing within the next six days.

How to Play

Paper Playslips. In-store, players can use the Pick 5 playslip to mark up to five plays, including numbers, wager amount and play type as well as any multidraw or advance play option. Straight/Box plays can only be played for \$1.

Note, that on a Pick 5 playslip, if a front/back play type is selected, only the digits marked on the appropriate columns will be recognized.

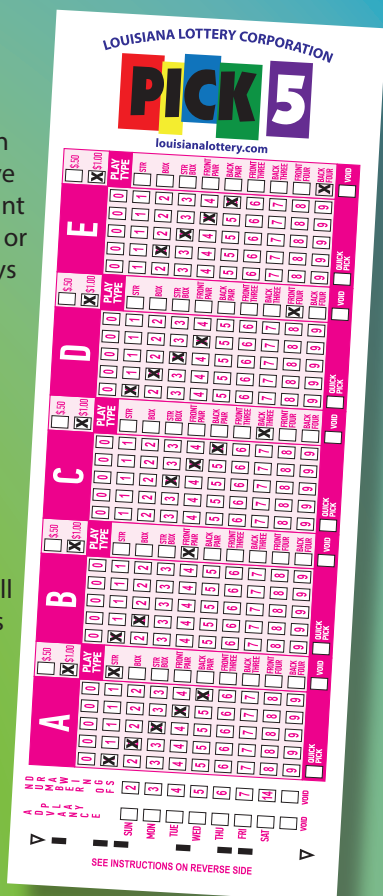

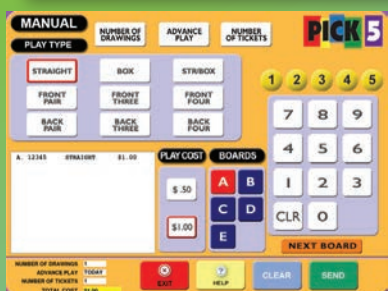

(For example, on a Back Pair play, if the player marks digits in the first three of the five columns, they will be ignored.) Conversely, if digits are missing from the respective columns, the playslip will be rejected as having too few numbers selected.

(For example, on a Back Pair play, if the player does not mark digits in the last two columns, the playslips will be rejected.)

Digital Playslip. A Pick 5 playslip can also be created on the Lottery's Official Mobile App by selecting and saving each play and ticket options. Digital playslips in the form of a QR code can be accessed on players' mobile devices for scanning at the point of purchase with the terminal barcode scanner to create the ticket.

Manual Play. Retailers can also use the one touch buttons on the terminal home screen to generate up to 10 quick-pick plays on a single ticket.

Good to Know

- **Pick 5** will be drawn daily except on Christmas Day and Easter Sunday. Tickets must be purchased by 9:30 p.m. on the day of the drawing.
- **Pick 5** sales, cashes and commissions are listed as separate line items (under Online) for all terminal-based reports.
- **Pick 5** tickets can be added under the Play Preview terminal functionality.
- The Ticket Replay function also works with **Pick 5** to generate a new wager on a previously played ticket.
- **Pick 5** will be added as a \$1 Straight play to the all-games bundle, to be called the \$9 Buck Bunch. When using this button on the terminal, one quick-pick ticket for each Lottery draw game is produced.
- **Pick 5's** prize payout liability limit is \$6 million. Once this has been reached for a particular number combination, sales for it will cease for that drawing.

To avoid confusion over what the player desires, using a playslip is the best way to go. However, retailers can manually create a Pick 5 ticket by selecting the Pick 5 logo on the terminal home screen, and then adding plays manually to the ticket, including the play type, play cost and digits as well as options for multidraw, advance play and the number of tickets desired. As plays are added they will appear in the white box in the center of the screen.

The total cost of the ticket will appear at the bottom left corner of the terminal to confirm with the player before pressing send to generate the ticket.

Pick 5 Prize Chart

Description of possible Pick 5 plays	Odds	Your #	Example # Drawn	Payouts	
				\$0.50 play	\$1 play
STRAIGHT: 5 digits in exact order.	1:100,000	12345	12345	\$25,000	\$50,000
