INSTANT INVENTORY DETAIL

How to Access:

MAIN MENU>SCRATCH OFFS>INSTANT REPORT
MENU>INVENTORY DETAIL

Report Purpose & Use:

This report reflects all instant/scratch-off packs currently assigned to the retailer, including the game and pack number, game name, status and the date the status commenced.

Packs that have Shipped are in transit to the retailer's location. Packs that are Issued are those the retailer has confirmed on the terminal as being received. Packs in Activated status are those the retailer has activated on the terminal for sale but has not yet paid for. Packs that are Settled are those that have billed to the retailer's account during the last 7 days.

Because each pack can be in only one status at a time, retailers who are billed immediately upon activation (Activation Only) will not see packs in Activation status.

The report can be used to keep track of retailer scratch-off inventory, including what is on order, what should be in storage, and those packs that have been activated for sale and/or billed during the accounting week.

WEEKLY INSTANT CASHES

How to Access:

MAIN MENU>SCRATCH OFFS>INSTANT REPORT MENU>WEEKLY CASHES

Weekly Instant Cashes for last 52 weeks can be accessed by selecting the week-ending date.

This report is also available on a DAILY basis for the previous three years or on an accounting week-to-date (W-T-D) basis by selecting those menu options.

Report Purpose & Use:

This report reflects the number and value of all instant ticket validations for each day of the accounting week ending on the date reflected on the report. The report breaks down the validations by Cash prizes paid and Free Tickets redeemed.

The Total Cashes amount appears under the Instant/Cashes area of the Weekly Invoice. Because the retailer is reimbursed the full face value of the ticket as a cash, they effectively earn commission on the FREE ticket given.

The Weekly Instant Cashes report is helpful in digging deeper into the metrics behind the amount of scratch-off winnings the store is paying out, which impacts their Cashing Incentive. Free ticket cashes information can be helpful in understanding its impact on inventory.

PICK 5/PICK 4/PICK 3 LIABILITY REPORT

How to Access:

MAIN MENU>WINNING INFO AND JACKPOT>PICK 3 LIABILITY REPORT or PICK 4 LIABILITY REPORT or PICK 5 LIABILITY REPORT

Report Purpose & Use:

These reports indicate any Pick 3, Pick 4 or Pick 5 combinations that are on the cusp of reaching or have already reached their liability limit. A liability limit is set for Pick 3, Pick 4 and Pick 5 by the Lottery in order to ensure that it can pay all prizes won, which is particularly important in daily games since all prizes are fixed, not pari-mutuel. Once the liability limit has been reached for a particular combination, the terminal will no longer accept wagers for that combination.

These reports can help retailers track the popularity of certain number combinations and answer players' questions about the purchase availability of certain wagers.
