

# Guide to the Louisiana Lottery Official Mobile App

## The Power to Play Your Way

### Check Your Own Tickets!

Use your device's camera to scan the barcode of both draw-style and scratch-off game tickets to determine whether the ticket is a winner and the amount of the win! Results are saved as a reminder to cash in and are updated as future drawings occur on multidraw tickets.

### It's a Virtual Mobile Playslip!

Prepare your own draw-style game digital playslips – any time, any place – and save them for when you are ready to purchase. Because selections and the ticket cost are available before reaching checkout, the transaction is transparent and effortless when your ticket is created at retail.

### Fun, New Ways to Choose Numbers

Personalize your play with fun, unique ways to select your draw-style game numbers, including quick pick, self-selection, favorites, rolling the dice, shaking your phone, or using statistics of winning number frequency over the last year.

**Free Download.**

# Create a Digital Playslip

## 1. Select a Game.

Choose any Louisiana Lottery game tile from the home screen or swipe up or down for more game options.

- A. From the game lobby, tap the CREATE PLAYSLIP button.
- B. For more instructions on how to play the game, including a prize chart, tap the  icon.

## 2. Choose Your Numbers.

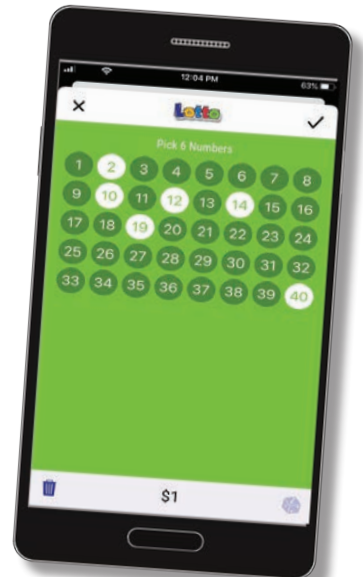

The app gives you lots of ways to choose your numbers, by tapping the icons at the top of the playslip creation screen. The available ways to play will vary based on the game.

 The Quick Pick icon will add a Quick Pick play to your playslip. QP symbols will display on your playslip rather than numerals because the Lottery's terminal system will randomly generate your numbers at the time of ticket purchase.

 The Manual Pick icon will allow you to self-select your numbers from the game's matrix. The cost of the play will appear at the bottom of the screen. To reset your selections, tap the  icon. To unselect a number, simply tap it again. To have the app automatically fill in any remaining selections needed to complete the play, tap the  icon. For Pick 3 and Pick 4, you must also select a wager amount and play type for your set of numbers. When you are satisfied with your selections, tap the  icon in the upper right hand of the screen to add the Manual Pick play to your playslip.

 The Favorites icon will allow you to add your previously selected Favorite Numbers to a play in chronological order. When adding a Favorites play, only the Favorite Numbers that fall within that game's matrix will be available for selection. To unselect a number, simply tap it again. When you are satisfied with your selections, tap the  icon in the upper right hand of the screen to add the Favorites play to your playslip. If you select fewer than the total numbers needed to complete the play, the app will automatically generate the remaining number(s).

 The Dice icon will have the app automatically generate your "lucky" numbers and add them to your playslip. You can also add this type of play quickly by simply shaking your device!

**|||** The Statistics icon will allow you to select your numbers based on their frequency of being drawn over the past year. The Statistics screen defaults to display the Times Since Drawn, with the ball numbers displayed on the left and the number of drawings since they were drawn on the right. Alternatively, select the Times Drawn button to display the number of drawings in which the number was drawn in the last year. Use the ↓ icon in either mode to re-sort the frequency. Tap a ball number to add it to your play; to unselect a number, tap it again. Your selections will appear at the bottom of the screen. To clear all of your selections, tap the 🗑 icon. When you are satisfied with your selections, tap the NEXT button to add the Statistics play to your playslip. If you select fewer than the total numbers needed to complete the play the app will automatically generate the remaining number(s).

### 3. Review & Save Your Playslip.

After adding your first play to your playslip, you can continue adding plays (up to 5) to your playslip by selecting the icons at the top of the screen or simply shaking your device to add a Dice play.

Edit a play by selecting it. A Manual Pick screen will appear for you to make your changes.

Delete a play by swiping to the left or tap the 🗑 icon to remove all plays.

You can also select other game add-ons or options on this screen as well as the number of drawings in which you would like to play the numbers on your playslip. The Playslip screen will default to one drawing. The total cost of your ticket will appear in the bottom of the screen. When you are satisfied with all of your plays and selections, tap the SAVE button.

## Purchase a Ticket at Retail

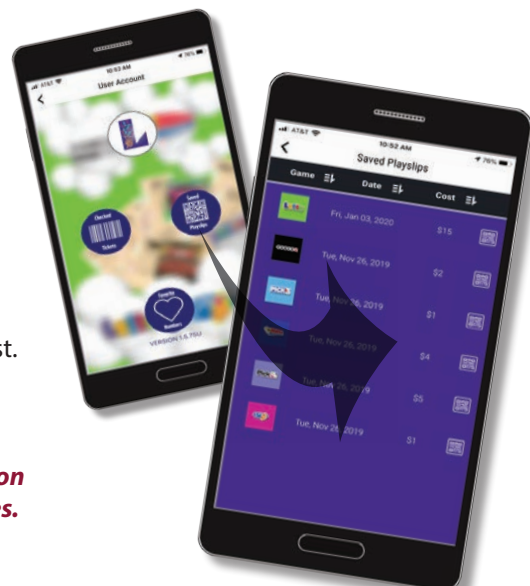

You can purchase a ticket using your app at any Louisiana Lottery retailer by saving a new playslip or by retrieving a previously saved one and then presenting the QR code at checkout.

Every time you save a playslip, a QR code will appear along with the price of the ticket. This is your digital playslip!

Not ready to purchase your ticket yet? You can retrieve the playslip code at a later time in the Louisiana Lottery app by selecting the Saved Playslips button located in your User Account, which can be accessed by tapping the 👤 icon in the upper right hand corner of the app home screen.

The Saved Playslips screen will display all the playslips you have saved, as well as their cost and the date you created them. You can sort by game, date and ticket cost. Find the playslip you want and tap on the 📄 icon to retrieve the digital playslip code.

**TIP: From the Saved Playslip screen you can also tap on any playslip to review its details and make any changes.**

# Check Your Ticket

The app allows you to check the winning status of a draw-style game ticket or scratch-off ticket. The results are stored for future reference.

1. Tap on the Check Your Tickets tile on the Louisiana Lottery app home screen. This will open your device's camera.
2. Position the yellow box over the barcode on the bottom of your draw-style game ticket to check your ticket. For scratch-offs scan the barcode on the front of the ticket underneath the scratch-off material.  
A message will display letting you know whether your ticket is a winner and if so, how much was won. If there are drawings still remaining on the ticket, that information will also display.
3. To access the results of any previously scanned ticket, select the Checked Tickets button located in your User Account, which can be accessed by tapping the  icon in the upper right hand corner of the app home screen. Then tap the ticket you are interested in.

The status of your checked ticket will update as drawings occur on a multidraw ticket without your having to rescan it by selecting the checked ticket you are interested in.

*Note that an original ticket is needed to claim a prize and all Lottery prizes must be claimed within their deadlines.*

# Additional Features

## Saving Favorite Numbers

You can select favorite numbers to have them available for use across games. To add a Favorites play, you must first designate your favorite numbers using the Favorite Numbers button located in your User Account, which can be accessed by tapping the  icon in the upper right hand corner of the app home screen. Select your favorite numbers or tap the number again to unselect it. Hit the  icon to save your selections.

## Accessing Winning Numbers & Draw Results

The latest draw results will always be available on your app in each respective game lobby. Tap them to access full prize winning details for that drawing.

For a list of winning numbers from previous drawings, tap the  icon and select the  icon or use the  icon to share results with a friend via text, email or social media!
